**\*RESTRICTED.**—Dissemination of Restricted Matter—The information contained in restricted documents and the essential characteristics of restricted materiel may be given to any person known to be in the service of the United States and to persons of undoubted loyalty and discretion who are cooperating in Government work, but will not be communicated to the public or to the press except by authorized military public relations agencies. (See also paragraph 23b, AR 380-5, 15 March 1944.)

(Supersedes the OSP&E, ORD S SNL G-176 portion of ORD 7-8-9 SNL G-136 and G-176, dated 25 January 1944 (Sections 3 and 4 portion of basic book), as changed by Changes No. 3, dated 27 April 1944 and Changes No. 4, dated 18 September 1944.)

This is a list of organizational spare parts and organizational equipment (accessories; tools; sighting and fire control equipment; applicable cleaning and preserving materials; and articles for instructional purposes) which are issued to the using arms or service for its use in performing 1st and 2nd echelon maintenance.

This standard nomenclature list is supplemental to Tables of Organization and Equipment, Tables of Basic Allowances and Tables of Allowances. It is therefore imperative that it be in the hands of all organizations and establishments concerned. Special attention should be given to its distribution.

Standard Nomenclature Lists in the G Group, are published either in one combined or in three separate pamphlets. When combined, the publication contains all information formerly published in the three separate pamphlets.

(A) When combined, the publication is known as the Ordnance Supply Catalog, ORD 7, 8 and 9.

(B) When published separately, the following are the three pamphlets—

(1) The LIST OF ALL PARTS or SERVICE PARTS CATALOG section—This list will be used for identification and storage purposes only.

(2) The ORGANIZATIONAL SPARE PARTS AND EQUIPMENT section—which lists items issued to organizations equipped with this materiel.

(3) The HIGHER ECHELON SPARE PARTS AND EQUIPMENT (Addendum) section—which lists major items, maintenance parts and equipment available for maintenance of this materiel. (This section is for use of Ordnance personnel only.)

For full information relative to Standard Nomenclature Lists, the procedure followed and the principles employed in their compilation, together with the purposes and uses thereof, see the Introduction (ORD 1 IOC), the Index (ORD 2 OPSI), and the Ordnance Provision System Regulations (OPSR).
